From the collection of:

Mike Jackson, FAIA

GENERAL NOTE

In compiling this UNIT MILLWORK catalogue, we have endeavored to present in convenient size and form, illustrations of all the windows and doors needed in the construction of any average home.

The different designs of windows shown have been successfully used in hundreds of homes during the last five or six years and their use has made it possible to get away from the ordinary stock window and fit each opening with just the design and size needed to carry out any desired arrangement.

A number of new designs have been added to our list of doors making this one of the largest assortments of up-to-date doors to be found in any catalogue in the Northwest.

The UNIT system is designed to make the purchase of windows and doors as easy as possible, and to avoid the danger of making errors in selecting this material.

When you build according to the UNIT system it isn't necessary to list the different items needed. Neither is there the danger of ordering more or less than you need of certain items.

To illustrate: Should you purchase one UNIT No. 303 in the Colonial Design on Plate No. 3, you would get one window 24x18/30 together with window frame, trim, sash weights, sash cord, sash lock and lift. The one price covering everything connected with this opening.

The same applies to doors. If door No. B-131 is ordered, the price would include the door, door frame, door trim, High Grade Yale Front Door Lock and door hinges.

After you have given us the number and sizes of the different windows and doors you need we will see that your frames are made correctly, and that you get the proper amount of inside finish. The correct weight is marked on each sash, and weights furnished to properly balance them after they are set in the frames.

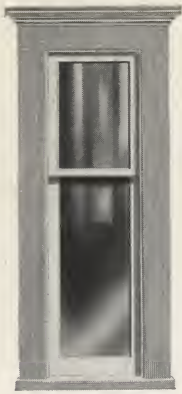

In ordering UNIT windows and doors, be sure to give Plate Number as well as Unit number, so we will know which design you have chosen.

If you order casement sash, state whether they swing in or out. This also applies to pairs of sash.

The price of Unit Front Doors includes Yale Front Door Lock, Syrian design AS7450, Zenobian Design AZ7450 or Athenian Design AA7450. Be sure to state which design you want.

Kitchen Doors and Interior Doors, are furnished with inside locks, Syrian Design AS8080, Zenobian Design AZ8080 or Athenian Design AA8080. This lock should be selected to match whichever Front Door lock you choose.

PHILIPPINE MAHOGANY FRONT DOORS

The doors shown on pages twenty and twenty-one are made from Philippine Mahogany; a beautiful ribbon figured wood imported from one of the islands of the Philippine group.

These doors are constructed by gluing a veneer of mahogany over a soft wood core. A high grade of waterproof glue is used to insure a permanent job even when the doors are exposed to driving storms.

MAHOGANY MOULDINGS

On pages twenty-two and twenty-three are shown a number of designs of mahogany mouldings and trim. There is a beauty and dignity in the soft ribbon figure of this wood that is making it increasingly popular with the builder who is trying to build the out-of-the-ordinary home. Its use, together with mahogany doors, in the main living rooms adds very little to the total millwork cost.

No.	Description	Net Size
300	Astragal	1 3/8 x 2
